

quick.

imagine...

inta

Imagine how much easier life would be if you could match washroom aids to the user - almost instantly.

Imagine for one moment the ability to realign the height and location of every aid.

Imagine doing this with no drills, screwdrivers or mess.

Congratulations, you've imagined **quick** - a new, comprehensive and elegant way of adapting washrooms and bathrooms to the differing needs of every user.

Once the pre-drilled horizontal rail has been fixed in place to the wall, every Quick product and accessory clicks onto the rail and is simply locked into place.

Then, the integrated, hinged cover drops in place, concealing the fixings and presenting a clean, designer look to the installation.

Both the horizontal and vertical positions of the product can be changed, providing assistance which adapts to the needs and abilities of every user.

In the case of the shower seat, both the arms and back and the seat positions are separately adjustable.
