

The Inta Infra-red urinal flush control is ideal for installations where hygiene is paramount, such as public toilets and washrooms. The users presence is detected by an Infrared sensor which controls a solenoid valve to turn on a timed flow of water. This will remove the need for any physical contact with the flushing device lowering the chances of coming to contact with unhygienic surfaces.

- Water saving
- Bistable solenoid
- Battery life approx 220,000 cycles
- 24hr non-usage auto flush feature
- Operates after presence is detected for over 10 seconds

## Product Range

Code	Description
IR2520CP	Infrared exposed urinal control

## Technical Features

Max Inlet Pressure (static):	8 Bar
Medium:	Water
Working Temperature Range:	5 to 65°C
Power Supply:	6V Lithium Battery
Flow Time:	6 Seconds
