

Product

60040CP - 1/2" Thermal Balancing Valve

60041CP - 3/4" Thermal Balancing Valve

Technical Specification

Max Static Pressure:	16 Bar
Max Operating Temperature:	90°C
Temperature Adjustment Range:	40-65°C
Accuracy:	±2°C
Medium:	Water
Flow Rate:	3 L/min
KV Value:	1.5 m3/hr

Additional Information

Helps to improve efficiency of DHW systems

Thermostatic self balancing control automatically responds to changes in system temperature and flow requirements

Reduces heat loss through lower circulation of hot water

Helps to keep temperature evenly distributed and reduces dead-legs

Reduces the consequences of oversized circulation pumps
