

# SOLAR TOOLS & FLASHINGS

LEAD/ALUMINIUM ROOF SLATE

## Introduction

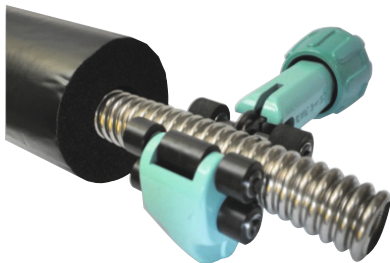

Intas range of solar tools and flashings have been designed to compliment any solar installation where the roof fabric needs to be penetrated to allow access for pipe work and sensor cables. Our solar flashings are able to make a water tight seal on all standard roofing materials, including tiles, slate and metal. Our solar tools are a must-have for any installing engineer, enabling them to cut and flange DN16 and DN20 pipe.

SINGLE PIPE/CABLE SLATES

- Comprehensive range of flashings available
- Suitable for all standard roofing materials
- Makes a weathertight seal on pipe and cable
- Available in lead and aluminium
- Single and twin pipe slates stocked
